Designer
Lenses
Included

WTNOVA-NL

Experience the marriage of beauty and durability as each Odyssey line fixture is built from solid brass and stainless steel and designed to last a lifetime.

Product Description

Designed to provide in-ground lighting solutions, the Nova is ideal for up-lighting a variety of elements, from trees and shrubs to pillars and other vertical structures. The die cast brass shroud is a standard accessory designed to minimize glare while the designer lenses allow maximum design control by creating various beam spreads and light output.

Use the Nova as a back, side or accent light for the perfect grazing or shadow effect. Recess the Nova in hardscaping areas by utilizing the included PBT sleeve.
